The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 5, 6, 9, 10, 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Maggenti et al. (US 6,477,150 B1).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Application/Control Number: 10/075,884

Art Unit: 2685

Regarding claims 1, 5, 9 and 13, Maggenti et al. disclose a system and method of placing a net in a dormant mode, including a transmitter, receiver and processor, where the processor determines whether the net has been inactive for a predetermined first time period; if it is determined that the net has been inactive for the predetermined first time period, causes each member of the net to enter a control-hold mode ("quiet mode"), wherein said each member of the net maintains its dedicated traffic channel; determines whether said each member of the net has been in the control-hold mode for a predetermined second time period; and if it is determined that said each member of the net has been in the control-hold mode for the predetermined second time period, causes said each member of the net to enter a dormant mode, wherein said each member of the net releases its dedicated traffic channel. See FIG. 5, col. 13, lines 9-16 and 51-57.

Regarding claims 2, 6, 10 and 14, Maggenti et al. disclose causing said each member of the net to return to an active mode, wherein said each member of the net maintains its dedicated traffic channel, if a member of the net requests a group call, if it is determined that said each member of the net has not been in the control-hold mode for the predetermined second time period. See col. 13, lines 12-15 and 63-65.

Allowable Subject Matter

- 3. Claims 3, 4, 7, 8, 11, 12, 15 and 16 are allowed.
- 4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose a combination of elements/steps in a system or method of

Application/Control Number: 10/075,884

Art Unit: 2685

placing a net into a dormant mode, including causing each member of the net to cache a state of its service configuration before entering the dormant mode, as required by claims 3, 7, 11 and 15.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Amin et al. (US 6,714,987 B1) disclose releasing a traffic channel when transitioning from standby mode to dormant mode.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-16 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of copending Application No. 10/075,821. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of Application No. 10/075,821 recite determining inactivity of a net member/communication device for a first period, determining

whether the net member/communication device has been in control-hold mode for the first period, and causing the net member/communication device to enter a dormant mode, as in claims 1, 5, 9 and 13; causing the net member/communication device to return to active mode on request, as in claims 2, 4, 6, 8, 10, 12, 14 and 16; and causing the net member/communication device to cache a state of its service configuration before entering the dormant mode, as in claims 3, 7, 11 and 15.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sam Bhattacharya whose telephone number is (703) 605-1171. The examiner can normally be reached on 8:30 a.m. to 5:00 p.m., Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F. Urban can be reached on (703) 305-4385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
